

- Commitment

Argolin Ltd is committed to:-

- An ongoing programme of environmental and ecological responsibility. This includes improvement and prevention of pollution and to comply with all applicable local, national and international standards and relevant legislation;
 - Monitor, evaluate and update its procedures and processes in line with policies, objectives and targets which are designed to meet the ISO 14001 standard.
- Information and Communication
 - Our staff have access to and are trained in the company's environmental procedures and processes
 - Encourage suppliers, contractors and customers to increase their environmental friendly practices
 - This policy statement is available to the public upon request.
 - Resources
 - We recommend the use of renewable in preference to non-renewable resources.
 - We are economical of any resources used, whether renewable or otherwise, in order to ensure the least damaging impact on the environment.
 - We are REACH & ROHS compliant and do not use Conflict Minerals in our packaging

Recyclable

- Listed below are details of recycled materials we use in our conversion processes:-

Corrugated Fibreboard

- 100% recyclable, currently using up to 50% recycled material
- Argolin Ltd minimises waste which is compacted and returned to the mill for recycling into pulp

Expanded Polyurethane Foam (Sheet and Profile)

- 100% recyclable, commonly reduced to crumbs and used in the manufacture of reconstituted "chipfoam" or cavity wall insulation.
- No 'CFC's or HCFC's' are used in the manufacture

Expanded Polyethylene (LDPE 04), Corrugated Plastic, Poly bags

- 100% recyclable, currently using minimum of 30% recycled material
- No 'CFC's or HCFC's' are used in the manufacture
- Baled or bagged and returned for recycling

Adhesives

- We currently use only adhesives that are water soluble PVA emulsions or recyclable hot melt glues
